The Structural Engineer

The Journal of The Institution of Structural Engineers

INDEX: Volume 56A Monthly 1978

A

Acts and Bills: Liability for defective buildings: footnote to review 28
Anchor, R.D.: Design and construction of reinforced and prestressed concrete structures for the storage of water and other aqueous liquids —Discussion 254
Annual Dinner, 1978 . . . . . 2, 27, 68, 93, 187
Annual General Meeting, 1978 . . . . . 93, 131, 207, 231
Annual Report of Council, and Accounts for 1977 93, 107
Arumugasaamy, P: See Swamy, R.N. and P. Arumugasaamy
Associate Membership: TEC Higher Certificate Awards acceptable 231, 234

B

Baldock, N.: See Morreau, P. and N. Baldock
Bannister, J.L.: Fatigue and corrosion fatigue of TorBar reinforcement 82
Bars, reinforcing:
- Corrosion of reinforcing steel in concrete and its relation to cracking 77
- Fatigue in offshore concrete structures. 69
- TorBar reinforcement — Fatigue and corrosion fatigue 82

Basements:
- Proceedings of Symposium on design and construction of deep basements 28, 68
- Redevelopment of Queen Anne's Mansions 51

Beams:
- Bolted beam-column connections — limit state design. . . . . —Correspondence 217
- Fatigue and corrosion fatigue of TorBar reinforcement 82
- GENESYS as applied to detailed design of RC structures 277
- Load testing — practical aspects. 353
- Natural frequencies of structures for designers 245
- Simplified methods in CP 110. 209

Beeby, A.W.:
- Corrosion of reinforcing steel in concrete and its relation to cracking 77
- Reinforced concrete design calculations using small computers — DECIDE 287

Beeby, A.W. and H.P.J. Taylor: Use of simplified methods in CP 110 — is rigour necessary? 209
Bending moments: Resistance of brickwork to lateral loading . . . . . —Discussion 363
Benjamin, A.L., L.J. Endicott and R.J. Blake: Design and construction of some underground stations for the Hong Kong mass transit railway system 11
Bensasson, S.: State-of-the-art review of computer programs for the detailed design of reinforced concrete 275
Blake, R.J.: See Benjamin, A.L., L.J. Endicott and R.J. Blake
Bolton, A.: Natural frequencies of structures for designers 245
Bolts: Limit state design method for the tension region of bolted beam-column connections . . . . —Correspondence 217
Book reviews:
- Air and rain penetration of buildings: Paul Marsh 127
- AITEC — Industrelizzazione dell'edilizia e prefabbricazione 374
- Ambient energy and building design: ed. J.E. Randell (Proceedings of Conference) 305
- Applications of the theory of plasticity in soil mechanics: J. Salencon. 127
- Applied strength of materials: R.L. Mott 377
- Architecture and urban design: W. Houghton-Evans 377
- Behaviour and design of steel structures: N.S. Trahair 148
- BRE Digests: Building Research Establishment 10
- Building construction in warm climates, Vol. 2, 2nd ed.: R.J. Fullerton. 335
- Building construction in warm climates Vol. 3: R.L. Fullerton. 228
- Building organisation and procedures: G. Forster 377
- Chemical admixtures for concrete: M.R. Rixom 374
- Circular cylindrical shells subjected to concentrated radial loads: computational methods and charts of influence surfaces by Klaus-Wolfgang Bieger (English translation). 128
- Civil engineering education and training, 1976: (Conference organised by Institution of Civil Engineers), September, 1976 225
- Comité Euro-International du Béton. Autoclaved aerated concrete: CEB manual of design and technology. 305
- Complete guide to demolition: D.M. Pledger 225
- Computational methods for the solution of engineering problems: C.A. Brebbia and A.J. Ferrante 263
- Computer programs for continuous beams — CP 110 Evaluation Report No.2: Simon Bensasson 305
- Concrete admixtures: use and application: ed. M.R. Rixom 224
- Construction of Linings for reservoirs, tanks, and pollution control facilities: W.B. Kays 225
- Construction technology, Vol. 4: R. Chudley 225
- Design considerations for a precast prestressed apartment building: Prestressed Concrete Institute 10
- Design of reinforced concrete elements (in accordance with CP 110:1972): R.W. Clements 126
- Design of structural steelwork: P. Knowles 92
- Differential equations for engineers: T.M. Creese and R.M. Haralick. 374
- Elements of experimental stress analysis, SI ed.: A.W. Hendry. 10

Enterprise versus bureaucracy: the development of structural air-raid precautions during the 2nd World War: Lord Baker. 304
Equilibrium of shell structures: J. Heyman 263
Exploration for rock engineering, Vols 1 & 2: ed. Z.T. Bieniawski (Proceedings of Symposium) 20
Fibre reinforced materials — design and engineering applications: ed. J.S. Davis 304
Finite element in geomechanics: ed. G. Gudehus 126
Finite element method, 3rd ed.: O.C. Zienkiewicz 224
Finite element programming: E. Hinton and D.R.J. Owen. 225
Foundation engineering in difficult ground: ed. F.G. Bell 304
High-rise building structures: Wolfgang Schueller 225
Highways and the environment — colloquium, 1976 305
Historical outline of architectural science, 2nd ed.: H.J. Cowan 224
Illustrating basic (a simple programming language): D. Alcock 173
Information methods, for design and construction: J. Paterson. 10
Instrumentation for ground vibration and earthquakes: ed. Thelma Darwent (Proceedings of Conference) 305
Integral equation methods in potential theory and elastostatics: M.A. Jaswon and G.T. Symm 304
John Scott Russell, a great Victorian engineer naval architect: G.S. Emmerson. 228
Lightweight aggregate concrete CEB/FIP manual of design and technology prepared by Comité Euro-International du béton & Fédération Internationale de la Précontrainte (FIP) 10
Lightweight concrete, 3rd ed.: A. Short and W. Kinniburgh. 377
Matrix analysis of structures: K.H.M. Bray, P.C.L. Croxton and L.H. Martin. 155
Measurement in contract control: M. Barnes and examples of the CESMM: M. Barnes 263
Mechanical boring or drill and blast tunnelling: ed. P.A. Persson & R.L. Schmidt 127
Numerical methods in offshore engineering: ed. O.C. Zienkiewicz, R.W. Lewis and K.G. Stagg 304
Pile design and construction practice: M.J. Tomlinson 224
Probability concepts in engineering planning and design, Vol. 1 — Basic principles: A.H.S. Ang and W.H. Tang 377
Quality and total cost in buildings, service design: Ed. D.J. Croome and A.F.C. Sherratt. 224
Reinforced concrete: design theory and examples: T.J. MacGinley 305
Shelter after disaster: Ian Davis 378
Simplified design of reinforced concrete: H. Parker, 4th ed, prepared by H.D. Hauf 20
Simplified mechanics and strength of materials: H. Parker, 3rd ed., prepared by H.D. Hauf 20
Steel buildings — analysis and design, 2nd ed.: S.W. Crawley and R.M. Dillon. 173
Stiffened plates — bending, stability and vibrations: M.S. Troitsky 148
Strength of materials: B.I. Sandor 378
Structural analysis, 2nd. ed.: H.I. Laursen 378
Structural analysis for engineers: N. Willems and W.M. Lucas 374
Structural stability Research Council, Guide to stability design criteria for metal structures, 3rd ed.: B.G. Johnston 263
Structural steelwork for building and architectural students Reynolds and Kent and D.W. Lazenby 127
Structures, 2nd ed.: W.T. Marshall and H.M. Nelson 126
Summary report research workshop on progressive collapse of building structures: ed. J.E. Breen 148, 155
Surface modelling by computer (Proceedings of Conference) 126
Surveying, 4th ed.: A. Bannister and S. Raymond 126
Thames Barrier design (Proceedings of Conference) 305
Vibration — beams, plates and shells: ed. A. Kalnins and C.L. Dym 263
Wood preservation: B.A. Richardson 305

Branches:
East Anglian: Creation 1
Lancashire and Cheshire: Jubilee Travelling Scholarship 121
Midland Counties: Jubilee Travelling Scholarship 187

Brickwork:
Resistance to lateral loading . . . . . —Discussion 363
Royal Exchange Theatre, Manchester 189

Bridges:
Code of practice for steel bridges (BS 153) — Conference. 159
Concrete bridges in Japan 291
Dynamic motion of structures — Human response 237
Economics of steelwork design . . . . . —Discussion 298
Kessock Bridge design and build contract procedures 345
Stiffened steel compression flanges . . . . . —Correspondence 199
Temperature distributions and stresses in concrete bridges. 143
—Correspondence 244

Brohn, D.M. and J. Cowan: Teaching towards an improved understanding of structural behaviour . . . . . —Correspondence 290, 330

Buckling:
Stiffened plates in compression post-welding distortion 133
Stiffened steel compression flanges . . . . . —Correspondence 199
Stiffened steel compression panels . . . . . —Correspondence 197
—Errata 333

Building and buildings:
Anything you can do? ... towards a more efficient industry . . . . . —Open discussion 357
Assessing existing buildings for strength 43
Brickwork: resistance to lateral loading . . . . . —Discussion 363
Conversions — general guidelines 46
Defective building — liability: footnote to review 28
Housing: NHBC structural requirements 3
Human response to dynamic motion of structures 237
Integrating new and old buildings. 39
Load testing of concrete building structures. . . . 347
Low-rise buildings: foundations. 161
Low-rise buildings of hybrid construction: Symposium July 5, 1978. . . . . 93, 131, 159, 187, 233
Proposals to extend current Building Regulations to cover heating controls (other than dwellings) 121, 159
Queen Anne's Mansions: redevelopment 51
Science Museum east infill scheme 29
Standards for rehabilitated buildings 35
Symposium on BS 449: Steelwork: Part 1: Simple and continuous construction 131
When time is of the essence 311

Burland, J.B.: See Tomlinson, M.J., R. Driscoll and J.B. Burland

C

Caissons: Construction of gas treatment platform for Frigg Field for Elf-Norge. . . . . —Discussion 177
Carlsen, C. and J. Czujko: Specification of post-welding distortion tolerances for stiffened plates in compression 133

CEI:

A

Al-Sarraf, S.Z.: Elastic instability of struts on, or driven into, elastic foundations 13
Arthur, P.D. and J.W. Cairns: Compression laps of reinforcement in concrete columns 9, 19
Awadalla E.S.: See Jenkins, W.M., E.S. Awadalla and A. Burns

B

Banas, L.: Elastic constraints form of intersub-structure boundary conditions . . . . . —Synopsis 28, 68
Beams:
- Deep plane frameworks with stuffed joints 85
- Elastic instability of struts (elastic foundations) 13
- Prestress analysis for continuous beams (equivalent load). 29

Beguin, G.H.: Steering of a concrete deck on flanges of steel girders. . . . . —Synopsis 7, 67
Bending moments, etc.:
- Deep plane frameworks with stiffened joints 85
- Longitudinal bending behaviour of composite box girder bridges having incomplete interaction 53
- Masonry infilled steel frames for bracing structures 1
- Optimum design of RC slabs. 61
- Polynomial tailoring domes on a plane base —Synopsis 7,67

Bhattacharya, S.R.: See Buchholdt, H.A. and S.R. Bhattacharya
Brickwork orthotropic panels of low tensile strength — ultimate load analysis 81
Bridges:
- Longitudinal bending behaviour of composite box girder bridges having incomplete interaction. 53
- Model and prototype tests of curved flyover, compared with computer analysis. 69

Buchholdt, H.A. and S.R. Bhattacharya: Gradient method for the analysis of cable structures with flexible boundaries and laterally loaded cables. . . . . —Synopsis 28, 68
Buckling: Collapse behaviour of rectangular steel box girders. 75, 84
Buildings: Static and dynamic full-scale tests on portal frame structure- 45
Burns, A.: See Jenkins, W.M., E.S. Awadella and A. Burns

C

Cables: Gradient method for analysis of cable structures with flexible boundaries and laterally loaded cables . . . . . —Synopsis 28, 68
Cairns, J.W.: See Arthur, P.D. and J.W. Cairns
Catchick, B.K.: Prestess analysis for continuous beams: some developments in the equivalent load method 29
Chung, H.W., P.K.K. Lee and D. Ho: Model and prototype tests of a curved flyover and comparison with computer analysis 69
Codes of practice:
- Compression laps of reinforcement in concrete columns 9, 19
- Longitudinal bending behaviour of composite box girder bridges having incomplete interaction. 53

Collapse behaviour of rectangular steel box girders 75, 84
Columns:
- Composite columns, restrained — tests 21
- Concrete columns — Compression laps of reinforcement 9, 19
- Elastic instability of struts on, or driven into, elastic foundations 13
- Steel gantry buildings — optimum design . . . . . —Synopsis 52, 92

Composite construction:
- Longitudinal bending behaviour of composite box girder bridges. 53
- Tests on restrained composite columns. 21

Compression laps of reinforcement in concrete columns 9, 19
Computation:
- Collapse behaviour of rectangular steel box girders 75, 84
- Deep plane frameworks with stiffened joints 85
- Model and prototype tests of curved flyover and comparison with computer analysis 69
- Optimum design of steel gantry buildings . . . . . —Synopsis 52, 92

Concrete:
- Compression laps of reinforcement in concrete columns 9, 19
- Model and prototype tests of curved flyover and comparison with computer analysis 69
- Optimum design of reinforced concrete slabs 61
- Prestress analysis for continuous beams — equivalent load method developments 29
- Steering concrete deck on flanges of steel girders . . . . . —Synopsis 7, 67
- Yield line method by finite elements and linear programming 37

Construction: Steering of concrete deck on flanges of steel girders — sliding shoes. . . . . —Synopsis 7, 67
Crisfield, M.A.: See Puthli, R.S., W.J. Supple and M.A. Crisfield

D

DaFonseca, A.M.A.: See Munro, J. and A.M.A. Da Fonseca
Deflection, frames:
- Design of masonry infilled steel frames for bracing structures 1
- Tests on restrained composite columns. 21

Design, structural:
Design of masonry infilled steel frames for bracing structures 1
Elastic constraints form of intersubstructure boundary conditions 28, 68
—Synopsis
Model and prototype tests of curved flyover and comparison with computer analysis 69
Optimum design of reinforced concrete slabs 61
Optimum design of steel gantry buildings —Synopsis 52, 92
Detailing: Compression laps of reinforcement in concrete columns 9, 19
Domes, polynomial tailoring, on a plane base —Synopsis 7, 67
Dowling, P.J.: See Moffatt, K.R. and P.J. Dowling

E

Economics: Optimum design of steel gantry buildings . . . . . —Synopsis 52, 92
Elastic constraints form of intersubstructure boundary conditions . . . . . —Synopsis 28, 68
Elastic instability of struts on, or driven into, elastic foundations 13
Equivalent load method — developments in prestress analysis for continuous beams 29

F

Foundations:
Elastic instability of struts on, or driven into, elastic foundations 13
Optimum design of steel gantry buildings . . . . . —Synopsis 52, 92
Frames:
Deep plane frameworks with stiffened joints 85
Design of masonry infilled steel frames for bracing structures 1
Optimum design of steel gantry buildings . . . . . —Synopsis 52, 92
Static and dynamic full-scale tests on a portal frame structure 45
Tests on restrained composite columns. 21

G

Gantry buildings, steel — optimum design . . . . . —Synopsis 52, 92
Girders:
Box girder bridges, composite, having incomplete interaction: longitudinal bending behaviour 53
Box girders, steel rectangular — collapse behaviour 75, 84
Steel gantry buildings — optimum design —Synopsis 52, 92
Steering of concrete deck on flanges of steel girders . . . . . —Synopsis 7, 67
Gradient method for the analysis of cable structures with flexible boundaries and laterally loaded cables. . . . . —Synopsis 28, 68
Grillages and grids: Model and prototype tests of curved flyover, and comparison with computer analysis. 69
